

COVERTRACK®

IAT 3G

**International Asset Tracker*

The IAT 3G asset tracking unit is a next-generation asset tracker and communications device incorporating super-sensitive GPS technology on HSPA cellular networks for installation inside any mobile asset. The IAT is mountable virtually anywhere, as it is built with superior internal antennas for cellular and GPS. This battery operated asset tracker is an ideal solution for managing assets that will be deployed for long periods without maintenance needs.

Designed to dramatically reduce costs and size while significantly improving field reliability.

Features

IP66 Sealed and Rugged Enclosure
Internal Cellular and GPS Antennas
Super Sensitive GPS Tracking
Built-in 3-Axis Accelerometer for Motion Sense
Ultra Low Power Sleep Mode
U.S. Military Shock and Vibration Standards

Voltage Monitoring and Low Battery Notification
Automatic, Over-the-Air Unit Configuration
Over-the-Air Firmware Download
2,000 Buffered Messages
Magnetic Case Available
FCC, CE, IC, PTCRB Certified

Specifications

Small Size 2.9" x 4.9" x 1.4" (11 oz)
3 or 6 1.5V AA Alkaline Cells
50 Channel GPS Location Technology
3G HSPA, SMS Packet Data

200uA @ 4.2V (Deep Sleep)
140 mA @ 4.2V (Continuous Transmit)
5.6 Mbps Upload / 7.2 Mbps Download

Mapping

Location, Speed & Heading
SMS & Email Alert System
Satellite & Map Views
Secure Online Mapping
No Software to Install

Landmarks
Stop Reports
Address Reports
Geo - Fence Alerts
