

## CovertCall - Cell Phone Application

The **CovertCall Application** provides law enforcement a high-tech evidence gathering tool to help lead to more arrests and more convictions. The application creates disposable phone numbers that can be used for calls and texts with targets without revealing your real number. Create multiple numbers for use with different targets without needing multiple separate phones.

Undercover agents can use this for various operations such as human trafficking, prostitution, vice, narcotics, or any situation where agents don't want to reveal their real phone number. The CovertTrack Command Center allows real-time monitoring of communication, and all phone calls and texts are recorded for evidence.

The CovertCall Application is available for Samsung Galaxy S Series (5 or higher).
