

## Stealth V & Stealth V Advanced

CovertTrack has revolutionized the covert *Slap and Go Tracker* industry with the development of the **Stealth V & Stealth V Advanced**. These new 4G covert trackers are built with multiple options to allow you to maximize not only the tracking of vehicles, but also high-value assets, bait objects, and shipments. They provide the flexibility for various types of technical surveillance operations along with pushing the limits on single deployment battery life with their large capacity internal batteries and optimized power management systems.

The Stealth mobile application, available for both iOS and Android, allows you to track your device easily. Using the 4G network from Verizon towers, the devices accurately track and pinpoint their location via GPS technology. Advanced features such as tamper detection are available and provide users the ability to know when the tracking device has been tampered with.

### Key Product Features

- Small and compact: 4.94” H x 2.81” L x 1.5” W
- Advanced alerts when the device detects tampering
- Extended battery pack for double the battery life (optional)
- The device can be a hardwired tracker or Slap-N-Go
- 2 inputs / 2 outputs (ex, lock doors, flashlights, disable the engine, etc.)
- Stealth V Advanced includes hardwiring cable + 2 inputs /2 outputs
- RF Pinger uses radiofrequency to allow for both device tracking and recovery\*

### CovertTrack Features

- 24/7/365 Customer Support
- Made in USA - engineered and built in Arizona
- 3-year maintenance: battery replacement, seals, housing
- CovertTrack Mobile App: available for iOS and Android
- 1 Year Full Warranty
- On-board storage: back-up and download tracking data\*
- CovertTrack is a 3SI Security Systems Company
