

Xtreme 4G

The **Xtreme 4G** device is a rugged “Slap-N-Go” Tracker. It is equipped with an IP67-rated case, making it weather-resistant and ready to perform in the most adverse situations.

Internal battery provides 25+ days of tracking at 30-second intervals and two hours of movement per day. Accelerometer detects motion and tilt, providing a more reliable removal alert compared to magnet and light based removal detection.

The Xtreme 4G device provides detailed tracking info via an iOS and Android-compatible app, or from our secure and proprietary tracking website.
